Amirhossein Ramezani

Full-Stack Developer · IT Manager · Creative Producer

ramezani@amirosein.ir · +98 912 621 4518 · amirosein.ir (Iran) · cv.amirosein.ir (international) · Tehran, Iran

I solve problems end to end — and look for the most efficient way to do it.

8 yrs running IT for a multi-branch business	**200+** staff using the internal platform I built	**156** animated episodes produced for TV	**55,000+** product images shot and catalogued

SUMMARY

I work across disciplines. Since 2018 I have been responsible for technology at the optical and contact-lens division of Noor Eye Hospital in Tehran — servers and networks, business software and data, and the internal tools more than 200 staff use every day. Before and alongside that, I studied architecture, produced and directed documentary and animation for national television, photographed for a magazine and for brands, and opened two book cafés.

What connects all of it is how I approach a problem. I ask questions until the real need is clear, compare the options, and choose the simplest path that will hold up — adapting an existing tool when it fits, building from scratch when it doesn't. I'm self-taught in software; I learn what a problem requires, and I finish what I start.

HOW I WORK

1. Understand
Ask questions until the real problem — not just the request — is clear.

2. Choose the efficient path
Compare options and pick the simplest one that will last. Adapt what exists; build only what's missing.

3. Build it properly
Whether it's software, a network, a film or an event: structured, documented and finished.

4. Keep it running
Backups, maintenance and support, so the solution still works years later.

EXPERIENCE

IT Manager CONTRACT · Noor Eye Hospital — Optical & Contact Lens Division

2018 – Present

Sole IT lead for a multi-branch business with 200+ staff and 180,000+ customers. Joined as a freelance developer in 2018 and have been responsible for all technology since 2020. Also a member of the ideation and marketing team.

- Built an internal automation platform (Next.js, React, PostgreSQL) used by **200+ staff**; leading its redesign.
- Localized **Vtiger CRM** for **80+ users**: Jalali calendar, Persian RTL, SMS and PBX integration, background workers.
- Run **3 servers** and **120+ workstations**, a WireGuard private network and the backup strategy.
- Migrated **six years** of sales and accounting records between Sepidar, Arian System, Nemesys and Holoo **with no data loss**.
- Built Lens Finder (PHP, 2018–2020); launched the online store and ran online sales (2020–2023).
- Led a 7-person photography and data-entry team: **7,000+ products, 55,000+ images**.

Founder · Moroor Studio — Web Design & Photography

2015 – Present

Websites including **7kala.ir** (a custom PrestaShop store, 2014), c1p.ir for Sivan Parsian (2014) and Hamayesh Sazan Rasha (2017). Clients include **Digi Service Holding (DGLand)** — launch events for its first retail stores, 2022 — and **Hamrahtel**, for product photography of its AKO brand, 2023.

Head of Digital Media · Hamayesh Sazan Rasha — Events & Conferences

2017 – 2018

Ran the digital and social media department. Built the company website and websites for its clients.

Computer & Laptop Technician · Self-employed

2014 – 2015

Hardware and software repair for laptops and desktops.
